Product Requirements Document (PRD)
Product Name: ManageTheFans — Client Onboarding & Content Management Portal

---

1. Elevator Pitch

ManageTheFans Portal is a secure, user-friendly platform designed to revolutionize client onboarding and management for Rent.Men masseurs and OnlyFans creators. This all-in-one solution streamlines subscription payments, content uploads, and appointment coordination, empowering MJ Duvall's clients to focus on their craft while admins efficiently manage data and communications. Stripe integration and role-based access ensure privacy, professionalism, and operational efficiency, transforming how adult service providers collaborate with management.

---

2. Who is this app for?

Primary Users
- **Rent.Men Masseurs and OnlyFans Creators:**
  Pre-pitched clients ready to sign up for services, seeking an easy way to pay, manage subscriptions, upload content, and receive appointment information. Users are assumed to be digitally proficient.

Administrative Users
- **Admin (MJ Duvall):**
  Full control over client data, content review, payment tracking, and communication, ensuring smooth operation of ManageTheFans services.

---

3. Functional Requirements

Core System Features

- **Client Onboarding Workflow**
  - Step-by-step process for new users to select service packages (OnlyFans, Rent.Men, bundles).
  - Upload ID for verification.
  - Accept terms and conditions.
  - Stripe payment integration for setup and subscription.
  - Specific Rent.Men-focused and OnlyFans-focused onboarding cards/forms, accessible via dashboard sidebar (or top menu on mobile).

- **Payment and Subscription Management**
  - Stripe integration for one-time setup fees and recurring weekly/monthly subscriptions.
  - Client billing hub to view plans, update payment methods, and download invoices.

- **Content Access and Management**
  - Secure upload system for clients to share media (images, videos, docs) in custom folders.
  - Admin access to browse, filter, and tag content.

- **Appointment Information Push (Rent.Men)**
  - Admin can send appointment updates to masseurs via manual forms.

- Appointment history log.
  - Delivery via email or in-app notifications (Resend Email API).

- **Notification System**
  - Alerts for payment completion, content uploads, and verification status for both clients and admins.
  - SMS messaging integration for client communications, accessible via a dedicated tab.

---

4. User Stories

- **As a Rent.Men Masseur:**
  I want to sign up for a service package, pay via Stripe, upload my ID for verification, and receive appointment details from MJ via tailored Rent.Men-focused cards, so I can focus on bookings without logistical hassle.

- **As an OnlyFans Creator:**
  I want to manage my subscription, upload content for review, and check billing status through a tailored OnlyFans-focused onboarding flow, so I can ensure my brand grows with MJ's help.

- **As an Admin (MJ):**
  I want to oversee all client data, review uploaded content, track payments, and push appointment info to masseurs, so I can manage my business well.

---

5. User Interface

- **Framework:**
  Leverage `shadcn/ui` for a modern, professional look.

- **Navigation:**
  Role-based dashboards (Admin vs. Client) with intuitive menus for onboarding, billing, uploads, and messaging. Dashboard is the initial landing page with sidebar menu for onboarding tasks.

- **Responsive Design:**
  Fully functional on desktop and mobile for clients on the go and for admin oversight tasks. Progressive Web App (PWA) implementation for mobile usability.

- **Branding:**
  Reflect ManageTheFans' commitment to discretion and professionalism with a sleek, neutral color palette (dark black background, dark red gradient primary, lighter red accents, high contrast for readability).
  Avoid overt references to adult services; use neutral terminology and abstract icons.

- **Key Screens:**
  - Onboarding steps with multi-screen/card layout (Rent.Men and OnlyFans-focused cards).
  - Client billing hub.
  - Admin user directory.
  - Content upload/preview interfaces.
  - Dedicated communication tab for SMS and email notifications.

---

6. Accessibility & Quality

- **Accessibility:**
  High-contrast mode, screen reader compatibility, large touch targets, scalable text, and voice-over compatibility for onboarding and notifications.

- **Quality:**
  Prioritize privacy, security, and professional tone throughout the user experience. All communications and notifications should be discreet and branded.

---

7. Integrations & Technical Details

- **Stripe** for payments and subscriptions.
- **Resend Email API** for transactional and notification emails.
- **SMS Messaging** for direct client communications (provider TBD).
- **shadcn/ui** for UI components and theming.
